What Are The ABC's Of Making Easy Money Online?

What do you do with your computer? If you are like most people you use it to send emails to friends and family members, perhaps read the news, look up favorite recipes, or watch a video or two. While most use the computer for things "such as these", others are using their computer to make some serious dollars. We would like to introduce to you five ways that people are making money online:

IDEA #1) Why Not Write For Blogs. Writing for established blogs is one of the easiest ways to make money online. You don't even need to have an established website, and you can make between \$5 and \$100 for every article you write. The amount of money you will make depends upon things like popularity, Alexa Ranking, RSS Subscribers count, Page Rank, etc. Some of the blogs that you should check out are:

a) ReviewMe b) SponsoredReviews c) Blogsvertise d) Payperpost e) Smorty f) Linkworth

IDEA #2) Filling out Online Web Surveys. There are legitimate and profitable web sites that will pay you to fill out their various online surveys...but you have to do your homework. Be sure to check into their payment history to ensure that they are legit, and check out the various comments and reviews that other users give them. One potential candidate is: CashCrate.com. Be sure to see what they offer.

IDEA #3) Why not write original content for other web sites? Everyone knows "something", and you might have some special and unique knowledge that others will pay for. You'll never know unless you try. Is there a certain hobby or technical skill that you are known for? If you are interested in making money in this way, you should look at:

1) About.com 2) eHow.com 3) Helium.com 4) Bukisa.com 5) AssociatedContent.com

IDEA #4) Working at Freelance Jobs. If you can do computer programming, or design web sites, write technical info, draw, etc. you can leverage these skills to make some extra money online. People are looking for these skills in the online marketplace today...and they will pay you good money for it. If this interests you, check out:

- Guru.com - GetaFreeLancer.com - Elance.com

IDEA #5) Make money via online affiliate sales. Do you have an established web site that a lot of people navigate to? If you have a good customer base, there are companies out there that are willing to pay you to send customers there way. Which companies? You can find a list of these companies by checking in at: Commission Junction, ClickBank, Amazon, and LinkShare. All you need to do is put one of their ads on your web site, and whenever someone goes to their site to purchase an item, you get a percentage of the sale. With Amazon you can make anywhere from 5-15% for each product you help to sell. For Clickbank the rate rises to 50-75%.
