# White Cyc LA - Seamless Backdrop

White Cyc LA is a particular seamless background with no visual edges, and sharp angles that cause shadows. White surfaced cyc can be utilized together with green screen to enhance the films\' visual effects. The advantages of white surfaced cyclorama are to make a visual illusion of infinite space, and also to give a background for all forms of lighting options to achieve the ideal background effect for the photographer. White surfaced cyclorama can be used to generate all sorts of backdrops for several types of movie media.

Quite a few expert photographers are updating the seamless paper backgrounds in their studios with more tough white cyclorama LA backgrounds. Why? Because white surfaced cyclorama gives the photographer total control with the option of background effects. The cyclorama normally is employed to cover up 2 walls of the facility. Taking into account managed lighting creates the backdrop impression of light or darkness. The use of color lights and pattern screens with the cyc produces attractive backdrops. In addition lighting may be used to make an infinity backdrop behind the subject matter.

White cyclorama LA backdrops with numerous kinds of illumination choices provide the photographer the choice of lighting or not lighting the background. For any dark backdrop only the foreground is lit. This highlights the model or product. For mood lighting, an inclined area can be chosen to produce a backdrop effect without competing with the model or the total impression of the image. There is no right or wrong approach for the photographer to make use of the cyc backdrop. It is completely manipulated by the photographer\'s imaginative eye to achieve the specified background.

Nowadays most professionals can have their very own white cyc LA backdrops in their studios, which allows them to create any type of backdrop effect required for a photo. Using a cyclorama background the photographer has infinite choices to shoot photographs with whatever kind of backdrop to accentuate the picture. White surfaced cyclorama used with green screen allows the photographer to set his models in distance locations or different surroundings without leaving his studio for costly location filming.

Film photographers can use the white cyc LA background for mtvs, dance routines showing infinite number of dancers, newsrooms, and weather reports. Plus the white cyc LA backgrounds allow for the photographer to shoot crowd scenes without all the extra people. It can even allow the photographer to place his model or product in the past or the future.

There are so many other sites giving various forms of advice on how to use White Cyc but most of them are not very specific or precise.
