Affiliate Link Cloaking Script - Stop Losing Hard Earned Commissions to Thieves

Affiliate marketing offers a world of opportunities on the world wide web for making a substantial income. One very serious problem with affiliate marketing, however, is the theft of your hard earned commissions. There are some very unscrupulous people out there lurking about, conniving to steal your profit right out from under your nose.

Affiliate link cloaking script will stop thieves from stealing money right out of your pocket. These are easy to use scripts or software programs that automatically \"cloak\" your links. This prevents affiliate thieves and hijackers from knowing your affiliate link code.

You will have to cloak and protect your commission links if you want to be a high earning affiliate internet marketer. There is a way to cloak some links manually, but it takes time and HTML/PHP skills.

You can purchase affiliate link cloaking software for around \$50. There are some packages out there that cost more, but why pay more when you can get one that works for less money?

If you market Clickbank products, you'll need a product that is capable of cloaking these affiliate links. You want a product that is easy to use right off the shelf, with no big learning curve. There are some products that offer some great additional features that will help you in many situations.

One particular cloak script feature is the ability to reroute your links. Let's say a vendor sells 30 or more products. Your link sends the shopper to the vendor's site, and they are overwhelmed with the choices and lose interest or become confused. This can result in sales losses. By rerouting your link, you can send the shopper directly to the specific product page, even if all the products use the same Clickbank link.

A redirect feature allows you to send the shopper to a sales page other than the vendor's. This is a good idea if the vendor's page just doesn't cut the mustard. You can create your own killer sales page instead, and route the shopper there in order to have a better chance of landing the sale.

Reroute and redirect capability allows you to focus a very strategic campaign and with a little bit of practice, you can become a top earning affiliate in no time. These are powerful features and you want them in the product you select. There are plenty of tools and toys for affiliate marketers, and if we aren't careful, we'll spend more than we're making on software and scripts.

Out of all the tools available to affiliate internet marketers, the affiliate link cloaking script is a very important one. If your affiliate commissions are stolen out from under you, you will never achieve your goals in affiliate marketing. Protect your links so your profits end up in your own pocket.

Protect your affiliate commission links with [Affiliate Link Cloaking Script](#). There is plenty of money to be made in [Affiliate Marketing](#), but you won't see a penny in your pocket if your affiliate links get hijacked. Protect your affiliate commission links.
