# **Advertising Internet Marketing Online For The Future**

Advertising internet marketing online is yet another method of promoting the given product or service using the World Wide Web or simply the internet. The main purpose of this being attraction of the target customers by efficiently delivering the message that the company wants to deliver and hence, having a direct impact on the bottom-line of any company.

There are many types of online advertising that might be as follows:

1. The result page of the websites of search engines can be used for online advertising.
2. Advertising found on banners which is displayed across web pages.
3. Using social networking websites' pages for online advertising.
4. Using those networks which are specialized in advertising.
5. Using the networks or websites that are exclusively made for the purpose of online advertising.
6. Sending emails to the buyers or consumers advertising the product or service is also a way of online advertising.
7. This kind of advertisements which is done by sending ads on emails is called as email marketing too.

You can make updates to the information posted on your company's as and when you want to with the help of Advertising internet marketing online. This advertising has paved way for what is popularly known as interactive advertising where the company which posted the ads receive the responses and feedbacks from the customers directly.

Not only is advertising on the World Wide Web cost effective but is also effective as it displays only the ads as per user request and on search engine pages you would find ads that is linked to the search only.

When coming to internet marketing it actually encompasses the online advertising as advertising is a part of marketing. Advertising internet marketing online is referred using many names which are as follows:

1. Electronic marketing commonly known as e-marketing
2. Marketing online
3. Marketing on web
4. Advertising internet marketing online is also known by the name of i-marketing.

All this simultaneously and originally refer only to internet marketing. Internet is the interface for the audience present and spread all across the world and the globe and this tends to often behave as a character that has this interactive capacity therefore it helps in receiving immediate feedbacks from the customers.

This is right now a major area of concern for the advertisers and it is also considered as a challenge for all of them to survive.
