# **Repairing Sash Windows Can Be More Environmentally Friendly**

Sash windows date back to the Victoria or Gregorian times and are still featured in many homes today. Because the original windows are made of softwood, they are likely to deteriorate over time and could warp or rot. You will need to consider the options to replace or repair your original windows and it is important to note that. **Repairing Your Sash Windows Is Better For The Environment Than Replacing Them And Also Could Save You Some Money Too.**

If you want to maintain the historical integrity of your home then you should consider repairing the windows and the new ones never carry the same look and feel and people will be able to tell that they are not the original windows. This could also affect the sales price of your property as many people will pay for original features.

One difference between original and replacement windows is that the newer windows often do not have the additional top pane which the originals do. This top pane plays a large role in regulating the air flow within the house and really makes a difference on hot days.

You may be experiencing higher energy bills in the colder months because of the deterioration of your old windows but this does not mean you have to replace them. By simply sealing them correctly and filling in any small holes in the wood you can increase their effectiveness.

If you do need to go ahead and replace the windows then you should consider selling them to an antiques dealer as this will put some money back in your pocket and will help the environment as they will not end up on the top of a landfill.

Remember that your original windows have served their purpose for over fifty years in most cases and because they do not make things like that anymore your new windows probably wont even last ten years.

You will find that sash windows can be fixed rather than changing them and harming the environment. You can find companies that can get your [sash window renovation London](#). You need to get with sash window company London.
