# You Need Traffic To Get Rich

Dear Friend,

The most effective way to attract a lot of traffic to your website is to score top position in a search engine's result page. Although only one website gains the top position at a search engine, you can do some efforts on your side to score high.

The best method to rise through search results ranking is to include an article that consists of at least 250 words or more. Make sure that the article contains keywords depicting relevancy to the content or product of the website.

Link exchange programs are becoming very popular to do. When you utilize a link exchange program, you then place their links on your site. These links will be put on your site and hold relevant information to what your site is all about.

How does link placing help in increasing traffic on your website? Let us assume that one of your partner sites is displayed on a search query and your website couldn't. In such a situation, the searcher is redirected to the site. In case, your partner website is not dealing with that particular product or service required by the searcher, the searcher needs to click on the link provided by a partner site. Although there is no guarantee that the link will be yours, these are increased chances.

When using link exchanges you may also want to consider the use of banner exchanges. They actually work very similar but banners will certainly require much more space.

Another great way to generate traffic to your site is to write articles around 500 words long and submit these to article directories. This is a huge advantage to anyone that is trying to increase traffic to their website. You simply get these articles out online and put your link in the resource box, and the traffic will certainly increase to your site. This is a method many people use to get more visitors to their site and one that seems to work well.

To your success

Jason

P.S. The methods stated above are just the tip of the iceberg. There are a lot more that can help you with increasing web traffic.
