A Look At Sash Windows And Their Beginnings Their Invention

Made from very simplistic components, sash windows are created with a basic frame with two window panels, an upper panel and a lower panel. These panels are attached to sliding tracks in the frame which allow them to be easily moved up or down.

There are a few different varieties of this window, the original being broken up into many square panels that are each separated by narrow bars. This creates a stunning window pane effect that can give a decorative effect on a home.

These panes windows were very commonly used in the 1600s when sash windows were invented by the English inventor and scientist, Robert Hooke. This style of the sash window is especially popular in homes that are Victorian or Georgian in style. The most popular panel windows have twelve panes: four rows of three panes each.

The modern day sash window consists of a double hung window with two sashes that are able to move up or down. Although all forms of the sash window are still used, these are the most popular. In recent days they have been created out of aluminum, which allows them to be more durable and energy efficient.

Though we are living in a day of modern technology where new discoveries and inventions are brought to light almost daily, it is amazing that the sash window is still so widely used. It may not exist in the exact same form that it once did, but the main idea of Robert's invention is still the same. This only proves the true ingenuity of his idea, that it has been able to withstand the test of time though all these years.

Popular because of its easy to open and clean features, sash windows have only been made better since their invention. You cannot walk through an housing complex or down any city street without being surrounded by houses that have these windows. Ancient paintings and buildings from centuries back have them. This product has withstood the test of time for many years and will likely continue to do so.

When it comes to [sash window renovation](#) repairs in london, you should find the right company that can repair them. A lot of companies around the area can be useful your [sash window repairs London](#) successfully.
