Make Money From Home - Much Like Driving Your Vehicle

Whenever you jump into your car, with plans of reaching your destination, your destination is your goal. You are one place, and you want to get to another place. Therefore, you have to plan and take action to reach your destination and achieve your goal. The same holds true for those of us who have a goal to make money from home. Similar to when we set our goal and take action to reach our destination, to make money from home, you have to (i) determine your goal; (ii) determine how you are going to reach the goal; and (iii) make sure that you are headed in the right direction. Essentially, this set of criteria holds true for any goal, as you will see below.

1) Specific Destination

When you get into your car, you usually do not do so without knowing where you want to ultimately end up. If you do not know where you are going, you will just drive around in circles and go nowhere. Therefore, if you need to get somewhere by a particular time, you need to know how to get there, and how long it is going to take you to get there. Thus, when you set your goals, you need to know what you want the end result to look like. For instance, if you want to make money from home, you have to define what this means. If you are at home, and get paid one dollar to fill out an online survey, you have made money from home. Would you be happy making \$1 from home per month? I highly doubt it. Therefore, if your goal is to earn enough money to leave your nine to five, then you have to envision yourself getting to the point where you walk up to your boss and hand in your two weeks notice. Whatever it is that you have as your end goal, put it down on paper, just as you would an address which you were driving to.

2) Directions

Of course, if this is a destination which you are familiar with, you need no directions for your route. It is automatic, like putting on your socks, or chewing gum. However, if it is some place new, how do you get there?

So what do we do when we do not know how to get somewhere? We get directions and write them down. We utilize technology such as GPS or Google Maps. Or we go old school and pull out a map. Often times the directions are not stellar, and we have to stop along the way and get more directions. Nonetheless, we do what we have to in order to achieve our end point.

Setting your goal to make money from home is much the same. You get in touch with others who already have already made money from home. You read books, you listen to mp3's, you attend seminars. You get as much information as possible that will assist you in reaching your goal.

3) Make Sure We Are Going The Right Way

Now that you know where you are going, and you have the directions, it is time to get moving. It is time to jump in the car, and step on the gas. Uh oh, wait a minute. Was I supposed to take Exit 67 or is it Exit 76? Now what do you do when you realize that you might be headed on a tangent? You check the directions again, you pull into a gas station and ask someone, you recalibrate your GPS. One way or the other, you make sure that you get back on track. You do not turn around, go back home, jump into bed, and hide under the covers. If you did this, you would never get anywhere that you had not been before, and your life would be very limited. Even if you have to go all the way back to Point A, you get back on the road and learn from your mistake. Since it was not Exit 76, it must be Exit 67. Eventually you will get to the destination, and it will be worth more the while.

When you set out on the road to make money from home, you may become lost here and there. Actually, strike that. You more that likely will lose direction at some point in the future when something does not go as planned. When this happens, even if you have to start all over, you will have learned something along the way. Just make sure that you get to your end goal.

All in all, I am simply telling you that if you have a goal to make money from home, only you can keep that goal from being accomplished. There will be speed bumps, red lights, and bumper to bumper traffic. However, this is nothing compared to your goals and what they will mean to you once accomplished. When something falls through and does not go as planned, you are gaining valuable experience. When you anticipated a result several weeks ago, and you are still working hard to achieve that result, it is on the verge of manifesting itself. However, if

you get lost, never be ashamed to stop and ask for directions.
