The Process Of Sash Windows: Painting And Decorating

You are primed and ready to go. You are ambitious. You are a do it yourself god. This is the project for you, and this project is to start painting those gorgeous sash windows that sit in your house. However, before you start to begin Painting and decorating sash windows figure out how to prevent painting windows shut, you really should know the right steps to achieve success. This way, you will have few mistakes and even less chance of having to restart your project or cover it with drapes.

The first step in painting is to figure out which type of paint you have on your house. Is it an old paint? Is it intact, or is it peeling off? If it is fairly intact, it is much easier to paint over it. Just wash it and smooth out any imperfections.

If your paint happens to be very old, you will need to strip the paint of the windows using paint stripper. However, if the old paint is very thick, it may be necessary to use more than one layer of paint stripper. Next, use glass paper to sand the area.

Sash windows are a challenge to paint in particular, since there are many small crevices and the sashes may block each other. The key to sash windows is to learn the proper steps as well as their order before beginning to paint.

To avoid the terrible painting of the window shut, tape down all surfaces you don't desire to paint. The key to the tape is to take it off after you are all done with your painting but before the paint is dry.

To do the real work, raise the inner sash and lower the outer sash. Next, take a small brush and paint the accessible bits of the outer sash. First do the glazing bars, then the lower cross bar and finally the side rails. The next step is to lower the inner sash, letting yourself only touch the unpainted areas on the upper sash. Now there is easy access to the top half of the upper sash. Now, paint the open areas, blending the paint on the areas you have painted already.

Now, the lower sash is completely accessible. Simply finish painting the rest of the areas. Do not move the sashes until the paint has thoroughly dried. Finally, close the sash and paint the side runners, then the windowsill. Finally, paint any areas that have not been done yet.

At last, you are ready to begging learning the art of Painting and decorating sash windows and how to prevent painting windows shut!
