# **Sharepoint Hosting Great Features And Benefits At A Great Price.**

Sharepoint hosting is an option to those who want to build a complex website or for those who simply want to build a simple website to have an online presence. There is now a lot of competition on the market for hosting services and this is good for all consumers looking to build a website.

The simple fact is that you need to purchase hosting space in order to have your website available on the internet. You want a hosting company that will give you good service and a good price. And you want a hosting company that will not have problems with their server which will cause your website to go down. You never have to worry about this with sharepoint hosting.

It is a well established company with many satisfied customers. The hosting packages are all price competitive and they include video tutorials to help you learn how to use these managed services. In addition as a Sharepoint customer you will receive regular email alerts when new additions to the hosting service are made. You will always be kept up to date by sharepoint.

You will also have Microsoft integration. This means you will be able to use your powerpoint, excel spread sheet and other Microsoft programs in conjunction with your websites hosted on sharepoint. With today's internet use going mobile you want to make sure that your websites are available to people logging onto the internet with their hand held internet devices.

You can do this with your sharepoint account. All you have to do is check a box when you are building your website and your site is accessible to mobile internet users. If you are working with others on your website you can allow whomever you choose to be able to have access to your hosting tools.

This is important if your office staff needs to update your websites or simply needs to see what is going on behind the scenes of your website. At the same time this hosting service provides up to date encryption security to keep all of your data safe and secure. And you can sleep at night knowing that all of your website information is backed up daily and kept off site.

You will not lose any of your website data. You can also install a forum on your website using sharepoint hosting. You can use this for basic communication or you can use this as a suggestion area for company use. You can create a library section on your website. This is an important feature for companies that want to make a lot of information available to their employees in one easy to access place.

You can make this password protected so only those within the company can view it. A few years ago you would have to pay a lot of money to have a hosting company with this safety, reliability, and options. But because of the competition of the hosting companies, the features and the pricing are favoring the customers needing hosting space.

As a leading provider of [managed services](#) for IT, we deliver the best IT solutions such as data centers, [VMware](#), and PCI, all in a secure and timely manner. We operate at the highest levels within the industry and offer unrivaled technical expertise.
