# **Want Your Own Logo Design Studio ? It's Easy!**

Every once in awhile, you want new graphics for your Web site, or newsletter. I know I do. When I go out looking for a new image from a designer or company, I'm always shocked by cost. Designers just don't want to create one small graphic for one small price. I simply want a small header graphics that I could post onto my website and newsletter.

I hunted online and checked out the design sites of countless professional design companies ...but never really found anything all that great. Plus, the graphics that come from software products like MS Word or Publisher just don't look all that great.

What I discovered was that I could actually have my OWN logo and graphic design studio. Just by using 2 or 3 software products! A logo creator for example, plus a business card tool and perhaps an animated logo product. The cost for these three in total would be much less than what a designer would charge me.

With the help of these great software tools, I created what I wanted in roughly 2 hours and got back to work writing my newsletter.

These software products offer me different look and feel from the clipart that comes with programs like Word. They contain Nice looking images like large colorful Orbs or unique fonts. Some of these software products allow you to select a template as a "jump off point and experiment with placement and color. You can adjust and move the images on the canvas anyway you like. You can replace the template text with your own! The sky's the limit.

When it comes to creating graphics ...a blank PhotoShop canvas is doesn't work for me I don't know where to start. Software products such as The Logo Creator are perfect. They give me a 'jump off' point.

When you're ready to create your images, most of these tools can offer export options like JPG, and PNG output (among other formats).

Most of the products are inexpensive. Especially compared to what a professional agency would cost you. The software is usually created to be easy to use (some are easier than others), and you may even find that experimenting with all of the templates gets pretty addictive. The templates offer a good variety of themes and basic designs. There's also enough flexibility to let you create logos for clients! Start your own logo design service.

I'm really excited about these products and I encourage you to download and try them out. Play around with some of the features. Creating graphics for your blog or social network group is SO easy. When you do it yourself, it's quicker, you have more control, and it's far less expensive. Especially when you just need a small page header or a blog image.

Learn more about these [logo design studio](#) tools and find out how you can benefit with your own [logo design studio](#).
