Planet X 2012 Facts -Their Significance To The Future Of The World

Are you aware of those Planet X 2012 Facts? Have you also learn the theory of solar system's other planets? Once, there was a scientist that claimed there are other planets aside from the Earth. At the outer space are believed to be found with other residents like mystical planets, advanced civilizations, and even aliens, making the galaxy said to be not alone too.

The outer space is such a sea of vast space, almost infinite, so come to think of it, those inhabitants may not be impossible at all. There is also this so-called Nibiru, or what is also known as Planet X. This Planet has a strong link to the 2012 doomsday - a worldwide catastrophe that some believe to be the end of the world.

The Planet X's significant role in the 2012 doomsday is a possible going near or causing collision against the Earth for this year, according to some experts. Given the theory as something that one cannot ignore, it must have come as a shocking news to most. It is however understandable and not surprising why not everybody may not easily believe in this Planet X theory.

It is not everyday that one encounters an issue seemingly as impossible such as this after all. However, it is not only once that the doomsday phenomenon has been much talked about. And now that many experts are using facts based on astronomy, anthropology, and most of all, history to come up with theories and propositions, many people now doubt less and less about this phenomenon and research for more information.

If it is something that you should concern yourself about or not, some facts below may help you learn more and decide about it. Claimed by Zecharia, Nibiru is not the Planet X - this is one of the facts. But another interesting fact from him is that Nibiru is rotating every 3,600 years, therefore its next visitation to will not occur until 3000AD since it last rotated in 600AD.

There is another theory, saying that the Planet X revolves every 2000 years around the Sun. If his theory is to be believed, then the next visit is going to be in the present millennium, 2012 probably, due to some history events that happened many years ago such as the Ice Age end, animal extinction, great tsunamis, and the great flood.

The ancient cultures including the Mayans that suggest the end of the world will be on 2012, the Zulus that say the world will shift poles, the Hindus that claim the Enlightened Ones are coming, and so on, are behind the coming of the Planet X, as according to the third fact.

In the fourth and fifth Planet X 2012 Facts, people are waiting for the development because these cover the media and government reports which point to the existence of this planet. They also include the fact that aside from the Earth, there are other planets in the Solar System experiencing global warming. Given all these facts, does the authenticity of the existence of the Planet X make sense with you now?

With all the [Planet X 2012 Facts](#) being widely covered by different sources, does it make sense to believe in its existence? Why not get more facts by checking more sources?
