Each headline should attract the readers to read more. Better yet, contact you.

Create autoresponder messages that will be mailed to those who input their personal information into your sign up box. A sale is closed usually on the seventh contact with a prospect.

If you only have a website, you will either close a sale or the prospect will leave the page. When you place useful information into their inboxes at certain specified periods, you will constantly be reminding them of the product. Focus on important points. As much as possible, avoid using the word "free" because there are still older spam filters that dumps those kind of contents into the junk.
