Classroom Computer Storage Boxes

With notebook computers virtually being used in every classroom across America it's vital to have a security measure set in place to stow them without fear of them being stolen. Due to the recent economic melt down, schools have seen a huge decline in funding for these laptops. Simply put, teachers cannot risk having these computers stolen.

A computer storage cart is made to protect and provide a safe way to store your computer. These cart units a perfect way to safely store your classroom computers from thieves and other unwanted visitors.

These carts vary in size and the amount of computer that you can store ranges from 10 to 45 notebooks. They have a rubber insert that handles the computers snugly.

Another nice function of these carts is the wheels that provide great mobility. This is nice if your having to share the notebooks with other classrooms. When it's time to clean up you can just move the cart up and down each row having the students place their computers in to the slots.

Security is also an important factor in these carts. Made from a thick gauge steel and having several locking points. No doubt your kids computers will be safe and secure.

Surprisingly these carts can be very inexpensive making it affordable to teachers, but since so much technology is put in to these carts they also can be expensive. The average price will range from \$150 to \$400 depending on the quality and capacity of the cart you choose.

Having several computers can be devastating and by far way more expensive than purchasing one of these carts. So the cost of these units should not hinder your decision to purchase one. Even if you have only one computer stolen...the price for one computer would offset the cost of the cart.

Hopefully the information provided in this article will give you a peace of mind that there is an easy way to protect your students computers. Having one of these carts has given me the confidence that I can leave the classroom and not be thinking if the computers will be there tomorrow.
