Benefits Of Playing The Stock Market Game

The stock market game is a popular learning tool. People use the game to practice their stock trading skills without actually risking their personal finances. As an educational tool, teachers have also embraced the game as a way to more effectively teach savings and investment skills while boosting the confidence and self-esteem of their students. The game has become popular because of the many benefits it gives.

Stock market games use data from various stock markets like the New York Stock Exchange and the NASDAQ. A person is allotted an amount of money, like a hundred thousand, acting as their initial fund. Next is generating a valuable portfolio from the data they are provided with and also develop a personal strategy that helps in sustaining its money-making potential. This is how the gamers are made to experience the real time stock market without losing real money.

The experience of playing this gains many other things for participants. Participants in these games generally have to form teams. This necessitates developing a team attitude as well as leadership abilities. These are abilities that can be used outside the game, in their respective professional lives. This makes playing beneficial to participants from all trades.

For people looking to work in the field of finance, experience in this game is important. In the game, economic know how as well as financial math is developed. Also, because the data for the game is drawn in real time from markets that actually exist, players may acquire a better understanding than is possible from just reading their textbooks.

Educators have also found these games to be very useful in class. There is evidence that attendance rates rise and dropout rates decrease in classes that use these games to teach various lessons. This may be because students find it more fun and applicable to real life. Educators can use aspects of the game to drive home lessons in Math, Social Studies, and Language Arts. Therefore, the game is very versatile in the lessons it can teach.

Because of the versatility of the game, teachers have employed it to teach students of all ages, from fourth grade to college. The game is also a way for teachers to make up for the smaller budgets they make do with. This is because stock market games are frequently cheap, and sometimes even free. The group with the best-performing portfolio can even win a prize.

But like in any other things, using the game has its cons. Not taking the game seriously is something teachers may find problematic since it is just a virtual game that does not make someone lose real money. When this happens, students tend to be hasty in their decisions throughout the process. Another thing is that an individual way of thinking differs when it comes to dealing with their own money thus; it is possible that the skill and care they show when playing the game become different in actual life.

The drawbacks notwithstanding, the stock market game is a very useful tool for students and teachers if used properly and with the right mindset. Even if students never turn to real investing, they would still have learned important life skills, like leadership and cooperation. Those who want to become investors benefit from practicing in a risk-free manner. Teachers on the other hand, can use the game for different things they teach in class.
