# **Online And In Business At Home With A Solid Company**

Are you a network marketer who has tried everything? Do you laugh about some of the products you tried to push in the days before the internet? Well that's me. I really don't have anything negative to say about these companies. Most of them have excellent programs with one of kind products. Unfortunately, it isn't the program or the products that cause so many people to jump from one program to the other. Lets face it if all your enrollees stayed the course and worked the business as hard as you did, no one would leave. But that isn't fair either. Some of your hardest workers will still drop out eventually simply because they can not afford it.

We already know that with network marketing, you must find at least a few individuals who are willing to stay the course and build the business. This is a major show stopper for us all. Fact is, you probably already know where I am going with this. Even though your downline members want the same success as you, they simply either don't possess the same skill set or maybe an even worse fate. Worse is when it becomes too expensive and they simply cannot hang on long enough to generate an income to replace what they have invested. So, they are gone before you know it.

After my last go at MLM, I said never ever again. Ironically, As I craft this page, I still have hordes of bottles of product setting under my cabinet. I contemplated that I would just drink it all myself, enjoy every sip and figure I got it at a discount. If your laughing at that statement, you can probably relate.

Now, savings and discounts is what inspired this article. A very good company and program changed my thinking about MLM. There are three apparent reasons why I got involved in the this great venture. First, it is very cheap to get started. Cheap in a good way. It will only cost \$70.00 your first month and \$20.00 a month after that to infinity and beyond. Now think about this. If it is only \$20.00 a month and you can afford that, shouldn't your downline members too. This is a program that anyone can afford to stay in financially.

Saving is my game and bleeding cash hurts. In many programs a substantial product purchase must be made every month to play the game and be eligible for commissions. If your spending a couple to three hundred a month and not putting anything back it can bleed you dry fast. This program is different. You don't buy juice or other consumables. Instead, for \$20.00 a month you get access to an endless supply of discounts at 175,000 stores around the world and in the community where you live. So, don't worry about stocking up your cabinet with products you couldn't drink in a lifetime. In this business to take advantage of the product, fire up your computer and print off your coupons or discounts. I know that is great, but the best and last thing about this program is the compensation plan.

If your an MLM "want to be" or experienced network marketer, take a few minutes to learn about this program. The membership allows me to pocket a little savings every time I go to the grocery store. I found a 50% off oil change coupon several days ago. \$29.99 suddenly gets chopped to \$14.99. If you do this once or twice a month at all the places you normally shop, your \$20.00 a month contribution is making you money without enrolling the first person.

Now is the time to start saving more and putting more cash in your pocket. You can do it all with this program. Take advantage of the discounts and the business opportunity that is attached. It makes more dollars and sense to me than any program I have ever been involved with. It is only \$20.00 a month after your initial enrollment.

About this program: Showing [affordable online business](#) solution for you. Also consider saving on everything you buy using this free application while you [shop online](#)
