How To Get Visitors In Your Website

Are you starting a home based business? Are you putting up a web site, or a blog to support it? Smart decision obviously, right? We all know that the future of commerce is going to be done online, and there is truly NO better time than right now to dive in if you haven't already. I'm a BIG believer in the power of the individual entrepreneur. I've been working for myself from the time I got out of college almost 20 years ago, and while I've had offices both LARGE and small over the years, I work from "home" right now, and have never been happier. For me. . . . "home" is where I am at the moment, and today it's a few blocks away from one of the most beautiful beaches on the east coast. . . . in a small but luxurious apartment I rented a few weeks ago.

You CAN build a effective home based business, and you can do it ALL on-line. Yes,your own business! ! !

I want to share with you a strategy I use to not only build my own business as a full time affiliate marketer and coach, but one that is SO super simple that it confounds me more people aren't using. It's an amalgamation of TWO bedrock principles of success. one that is somewhat unique to the online universe, and the other a cornerstone of ALL successful entrepreneurs you'll meet anywhere. To succeed you must work hard ! .

-Create Content

-Build Relationships

You can put these together, in a very different and strong technique, to build an UNLIMITED amount of traffic to just about any site, service or offer you want. This is especially powerful if you are a home based business owner and DON'T have a big budget to start.

All you want to do is this:

1) Write LOTS of articles related to your business. Identify very common concerns, conundrums and confusions. . . . and offer creative solutions in the form of short 350 to 500 word articles. Don't post these articles on your blog or web site. . . . rather, submit them to high authority directories, much like the one you are reading this on right now. You CAN and should be able to write 8 or 10 articles a day in under 4 hours. (I can do this in 2. . . but I have practice!) You should be doing keyword research and such too to optimize your titles, but this is not critical right now. Just aim for a minimum of 100 articles in 30 days. . . and the more the merrier. 2) Use ALL of the tools and technologies you can to bookmark these articles, share them across the social networks and re-purpose them around the web. This is the RELATIONSHIP component of this strategy. Tweet your articles. (you can actually have them set to automatically post to your Twitter account) Share them on Face-book. Stumble them. Encourage OTHER articles to re-purpose your content the very same way. . . . by building relationships with other people in your niche, and offering them access to your content. (hint. . . look for HIGH volume blogs in your niche, and offer to GIFT them one of your better articles. This works amazingly well)

The internet result?

I get a basic metric of 100 visitors per article inside the niches I publish most aggressively in. (your mileage may vary) 100 articles for me = 10,000 NEW visitors for free, and that's really only the TOP of the iceberg in terms of the beautiful benefits this approach will accrue. (you possibly can really become a ROCK-STAR in your niche if you are prepared do the above. . . and do it well, which CAN change your life, your home business Plus your bank account to boost !).
