MyPad Media Review - Is MyPad Media IPad Download Site A Scam?

Is myPad Media iPad download site a scam? You probably already have an iPad right now and want to fill it up with the latest eBooks to maximize its features. Ever since purchasing my own for about \$600, I have constantly been looking out for the best way to acquire more media files for the iPad. Today, I am using a website called myPadMedia that I have used to fill up my iPad with more than 1,000 different books for a very low one time fee. As compared to pay per download options that normally require about \$12+ to acquire, this website has been a much better and affordable option for me.

What is the Cost of Joining myPadMedia, and Is It Really Worth the Fee?

After learning that there is a money back guarantee for all members, I decided that there was no harm trying and got access to all the files inside for about \$50. I am pleased to say that I found many impressive collections of books in the download area, and immediately started to download all of my favorites by connecting my iPad to the Internet.

There are books in the genres ranging from classic, mystery, crime, thriller, romance, superhero action, anime and manga, to the best selling novels. There is also access to newspaper websites from all over the world.

How Exactly Is myPad Media Download Site Supposed to Work?

This is not actually a piece of downloadable software or application as many would believe. Instead, it is simply a membership website that allows legal access to a database of media files downloadable directly to the iPad. Within minutes, anyone can look for their favorite series and download them for no additional costs for a lifetime. I have found the user interface to be intuitive and easy to use too, and there is a 24 hour support team available to help with any queries that members have.
