Looking Through The Types Of Paper

In this day and age, printing is something that a lot of people are constantly doing, but do you know all about all of the different types of paper out there that you can print on? Well, that is exactly what this article is all about, the paper types that you should be on the look out for and just how fantastic they can make your printing job look.

Matte paper is first up and this type of paper is typically used for black and white printing only, as it is a smudge-free type of paper. Colors however, do not look brilliant and vibrant on this type of paper, so before printing, make sure that if it is a color copy, matte paper is not in the tray!

The type of paper that is fantastic for photos is called glossy paper and this is a paper that typically is only good for photos, as the finish of it is very glossy. The colors however look fantastic on this paper; they show up brilliant and bright, which is exactly how it is supposed to look.

Bright white paper is next and this is actually one of the most popular forms of paper, for it can be used for black and white printing or color printing. It all just depends on exactly what you are printing.

Card stock is the last paper type that we are going to talk about and this is a very, very thick paper that is fantastic to be used for wedding invitation inserts or even for flash cards if you are making those!

As you can see, there are a ton of different types of paper out there, you just really have to be on the lookout for the paper that works for all of your needs!
