# **Gain Employment With An Associate's Degree**

Earn a higher salary or work toward getting promoted in your current career by enrolling in an [distance bachelor degree](#). Having a college degree listed on your resume puts you a cut above the competition. It may seem like a difficult thing to accomplish when you're busy with a full time job and various other obligations, however, online degree education programs allow you to work and study for the career goals you have.

The answer to the four year problem could be an associate's degree. Students can earn an associate's degree in two years at a community or online college, and typically pay much less for classes than at a liberal arts college or large university. In addition, they can choose to study almost any field, including business, marketing, education, healthcare and technology.

There is also the advantage of earning an associate's degree over a bachelor's or other program. You will be able to re-enter the workforce sooner, as the amount of time it takes to earn an associate's degree is less than that of other programs. Potential employers are scanning resumes for candidates who have a higher education and this will take less of your time.

You may have just faced a big change in your career. Due to the shifting of our economy in the United States, many are being laid off, while others are considering a return to school to begin in a new field altogether. If you decide to pursue a degree, you may find yourself a cut above the competition in a pool of potential candidates for a position, when searching for a job.

Online colleges are a great alternative to the traditional campus based education. You can expect to have a more relaxed schedule, conducive to the other aspects of your life. If you're busy with work, family, and personal hobbies, this is a great way to work on a [online college](#) and study course materials at a time that is convenient for you.

All these reasons have made the associates degree a very popular option. Studies show that almost half of all American college students are enrolled in two year programs. Enrolling in a two year program is a great way to start your education and get the ball rolling on a career as soon as you graduate.

Almost half of all high school graduates start their college education with an associate's degree. There are two different types of associate's degrees that are popular. One is a more concentrated degree that focuses on a certain field. The other is a transferable degree that can be used to enter a bachelor's degree program.

If you're considering a move to a new career field, or you're re-entering the workforce after an extended absence, earning an associate's degree could be your best option. You could study in a number of different areas. Online college courses include several different fields of study. Whether your interest lies in graphic design, medical assisting, or information technology, there is an applied science degree in any of those fields. If you're interested in an associate of arts degree, you may take courses in education, psychology, or economics.

[Online degree](#) education programs answer the needs of so many new and returning students. While an [associates degree](#) gets one started, these distance programs also allow follow through when earning a master degree. Flexibility and the ability to continue much needed work are the future in education.
