Make Money With Patience

If you want to be 100% sure you will win the lotto, then you need to buy every single ticket at once. As the total cost of the tickets is higher than the prize, then you will lose money. So, for sure you will not make money if you do this. After seeing the numbers it is difficult to understand why so many people buy tickets with the hope to become rich some day. I would suggest buying tickets as a support action for the lotto organization, and that it is.

Of course there are more options similar to the previous one described here where you can receive a big amount of money at one shot. And if you analyze them thoroughly you will very soon discover that the probability to happen to you is extremely low. If you do not believe it, make the numerical analysis by yourself. Make it without emotion, just guided by the numbers.

If you are thinking the same way and believing the same things I bet you that you will be in the same situation after 10 years. Well, not exactly in the same situation, you will be 10 years older. That will be the only difference. You can take a picture of yourself from this day and just add a few creases and then you can see yourself 10 years from now. You will have lived some moments that you will remember with joy or sadness. One of those sad moments will be to think that you did not start something new to make money.

Just with a small example you can see money is good. And you master it, so you make good things with money. Thinking good of yourself will help you to stay still looking for your objectives. Create a powerful vision of yourself and stick to it. Create a vision that makes you feel good and motivate you to move forward. Then make a plan to achieve it. If you invest your life in this process, you will die as a happy person. You may not end earning 1 million dollars a year after 10 years, but I can assure you that whatever the outcome you get, you will be living a better life by then.

You need to stay motivated and in the rote to make money. When we receive a new idea that makes us a lot of sense, we feel that the light we have found will enlighten us forever. It does not happen that way. We need to maintain it fueling it with new ideas that support it. It is like when you get married being deeply in love. Love will keep you together for a few years. And then you need to commit yourself towards your spouse. You need to find new reasons to be together for the rest of your life. The relation matures and grows and you grow with it.

Look around and you will find countless examples of persons who have entitled themselves in a journey regardless the obstacles. Some times they do not have a clear idea as to how they will arrive to the goal. They just have an objective and put targets in the route. Remember an objective is to improve something, is the vision you wish to achieve. And a target is the numerical step defined to measure the advance. For example if you want to increase your income, that is your objective. And your target can be 10% after a year. You can define several targets along the time for an objective. You can think about another target by setting to increase your income 20% after 2 years and so on.
