Sometimes, Men Can Actually Be Right

Independent he is, but invincible he is not. Sometimes my husband, George, should have listened to me because he's made some interesting choices that he now regrets. Other times he gets along amazingly well without my counsel. Okay, I heard that laugh. I'm laughing with you. But to give you an example:

Two years ago we bought some bare root trees: a fig and an almond. Not realizing the time (which is usual for me) I failed to put my proposal in for where I wanted them to be planted. In dismay I stood looking at them later. The fig had been planted directly beneath the branches of one of our old apricot trees and the almond directly under the branches of another old apricot tree. His reasoning was that the apricot trees would die, we'd cut them down and the new trees would already be in place.

I just KNEW they would grow up deformed and squatty. But, as he predicted, both apricots popped off from old age and the little trees are cheerily holding their own. He was so right. Wife, you have a treasure in that man of yours. Maybe you can't see it right now, but start looking, dwelling on his good points rather on what you are quite sure is hurting your marriage. If you want more help in that area, read my books composed just for you:

A Woman's Emotional Needs and Love Me Always - 12 Ways Women Can Have Exciting, Lasting Love. You can find them in our women's material on our saving marriages site. If your marriage is too good to need saving, that doesn't mean it can't be better. We show you how to do that, too.
