If you're anything like most of us, nothing sounds better than a recessionary-proof income stream. Given the economic situation today, the question many of us are asking is how can such a lofty goal be reached in these hard times? The answer is, quite simply, by utilizing a more effective and efficient follow-up system.

As much as small business owners face many issues on a day to day basis, one of the biggest problems for entrepreneurs facing a recession isn't so much that people are less willing to spend money on non-essentials, but instead, that you as a business owner have to work harder to get the attention of potential clients.

Some recent studies tell us it can take 10, 15, or even 20 follow-up messages for prospects to develop into first time customers. The problem with that is, it means putting even more time and money into your business, usually when you simply cannot afford it. After all, time is money, no matter how you look at it!

While you will find that many providers can limit you to 7 or maybe 12 auto-responders per product or campaign, AutomatedEcommerceSolutions.com's Basic and Professional packages let you send unlimited, customized email messages to your prospects and customers ... automatically - even while you sleep! It is amazing how simple it is to implement - would you believe that you can be set up with your own account within minutes and for the first month spend less than 13 cents a day? The system is cost effective, easy to use, and it will help you grow your business. Think about it, in reality, you have nothing to lose!!!

Your new recession-proof business is just one click away. Check it out - you've got nothing to lose!! To learn more details regarding this exciting opportunity, visit www.ProspectsToProfits.net for more information.
