# **MyShoppingGenie - The Best Way To Save On Your Online Shopping**

Online shopping is touted as easier, more convenient and less time-consuming than trawling the local mall. There is, however, one area where online shopping can be less than satisfactory, and that is when you want to save on your online shopping and compare prices or find special deals. Now you can save on your online shopping with free MyShoppingGenie software - quickly and easily.

If you think about it, online shopping searches are quite time-consuming, First you have to search for the product. Then you start clicking on search results, never sure if you're going to end up at a retail site or not. Once you find a retail site, you've got to find the exact product you want - then start all over again on another site so you can compare prices. Nine times out of ten, you're looking for something else a week later, and find what you bought last week at a better price. Frustrating - definitely. Necessary? Not anymore, with MyShoppingGenie - the best way to save on your online shopping. MyShoppingGenie searches all the major online retailers and auction sites to find the best deals and lowest prices for you. The MyShoppingGenie application is free to download, and really easy to install and use - it will take no more than 5 minutes to get your online shopping streamlined and have MyShoppingGenie do the bargain-hunting for you.

The application works with whichever search engine you normally use, Google, Yahoo, Bing etc, so you don't do anything differently. Instead of hours spent searching online, you simply open your search engine, type in whatever it is you are looking for, and MyShoppingGenie does the rest for you.

Once the search results appear, the MyShoppingGenie toolbar at the bottom of your screen will list various retailers that are either offering deals on the product you are searching for, or offer the best prices. The 'Compare' button allows you to select from the top 5 or 6 retailers and compare their prices. The page on their site featuring the product you want to buy is then opened in a new window, so you can compare the various models, prices and deals on offer at each retailer.

Much easier than using a search engine, then finding there are over 3 million results for that product. Which of the many search results will lead you to a reputable retailer? Once you've clicked through to a retailer, you've got to go back and do it all again if you want to compare prices. And how many of the sites you click on are not what you thought they were, or don't actually sell directly, so you end up having to click through to yet another website in the hope that you can buy what you want there? This is a frustrating, time-consuming and very seldom satisfactory shopping experience. If you want to save on your online shopping, this hardly seems the best way to do it.

MyShoppingGenie searches over 200 000 online stores and manufacturers to find the product you have searched for at the best prices, and you only have to perform one search, in the search engine you normally use, are familiar with, and already have loaded on your computer. You can quickly and easily compare prices, compare products, and make a decision within minutes. MyShoppingGenie makes online shopping even more convenient, and what's more, the application software is free to download. Why wait - save on your online shopping with MyShoppingGenie now.
