# **Establishing The Proper Path For The FapTurbo**

Before going into any business specifically an online business, one need to understand the basic theme of the business. Froex trading is actually a non ending battle between the sellers and buyers. In this battle, people use different techniques to win their fight. In other words, traders use different software and trading techniques to get most out of minimum investment. In online Forex trading, automated software and robots play a vital role in success of any Forex trader. FapTurbo is a robot which is successfully used by many online Forex traders.

Configuring and using correct settings for any robot or automated system is very necessary. If 100 people are using FatTurbo and all are using its default settings, then it might be possible that ratio of success is much lower than expected, but using custom settings actually make the difference.

Basically FapTubo works on two strategies. The first one is scalping system - the strategy is a short-term trade which allows you to take profits in small ratios. The FapTurbo scalper trades in four foreign currency pairs (EUR/GBP, EUR/CHF, GBP/CHF and USD/CAD) normally in a fifteen minute chart. Here, the important point is that this technique is not the traditional method of trading, which is not liked by the brokers. In one day, FapTurbo performs 1 to 5 trades using a very strict money management.

The second strategy is a long-term FapTurbo strategy. The method trades on a longer time frame. FapTurbo is created to use a modified Forex autopilot in which user can define different types of filters to avoid trading in risky time periods.

Another great feature of FapTurbo is that it works when its user is even offline and we all know that Forex market works 24 hours, FapTurbo has the ability to work for you continually without taking any break. It means that FapTurbo will be monitoring the Forex market trends even when its user is sleeping or when he is on a family vacation.

The point is that one need to understand all of the required configuration and settings of the FapTubo and also need to see all the video tutorials provided with the package. Spending a little extra time will definitely save time and money in the future.
