Go To Online College And Take Courses For Free

Several leading colleges, universities and technical schools offer opportunities to participate in free online courses where students can learn new skills or brush up on existing abilities. Free online courses can also help students save hundreds to thousands of dollars, particularly in instances where degree-related credits aren't required. MIT, UC Berkeley, Columbia and Yale are only a few of the prominent institutions that offer free online business courses, technology courses, humanities courses and more.

The OpenCourseWare Consortium website allows for researching schools and subject areas where free online courses are offered. Depending upon a student's selected course of study, instruction might come in the form of podcasts, text-based assignments, exams and YouTube video lectures, or a combination of any or all of these venues. OpenCulture.com notes that colleges and universities have been establishing presences on YouTube since at least 2007. You can find so much more information about [online accredited degrees](#) on the web.

President Barack Obama has reportedly been a proponent of free online courses. The Obama administration is now drafting a program that would help pay community colleges to establish free online courses, according to a June Inside Higher Education report. The idea is in part to make college studies more accessible, and initial preference would go toward career-oriented courses, the Inside Higher Education article noted.

Students aren't alone in benefiting from free online courses, some say. Colleges, universities and technical schools might garner publicity by providing free online course lectures and conferences on offerings such as YouTube, OpenCulture.com suggests. A July report in artstechnica.com noted that MIT's free online course website itself receives 1.5 million-plus page views a month. The site, known as MIT OpenCourseWare, has been awarded a Science Magazine Science Prize for Online Resources in Education (SPORE), a July MIT news announcement noted.

The MIT site, with course materials for more than 2,000 courses, emphasizes studies in the sciences - engineering & computer science courses and media arts & science courses among them - it includes programming in areas such as writing and humanistic studies as well. UC Berkeley's free online courses for the spring 2010 semester come in the form of podcasts and webcasts, its website shows. They include subject areas such as anthropology, psychology, demography, public health, economics and intro to environmental economics. Students also are able to participate in archived course studies. Michigan and Penn State universities and Carnegie-Mellon also are among the institutions providing free online courses.

There are also online courses that private companies provide online at no cost. It's not uncommon for companies to send their employees to conferences and workshops as a means of enhancing their knowledge and updating their skills in certain fields. Organizations with different specialties might offer professional webinars that can help small business owners as well. You can always find more information about [university distance learning degree](#) on the internet. ?

A few colleges and universities also offer tuition-free degrees to those who qualify. A January Bloomberg Businessweek article highlighted the online University of the People that it noted includes students from developing nations. The provost and computer science department chair at this particular university are from Columbia and New York universities, according to a November 2009 news item on the University of the People website.

Cooper Union and Alice Lloyd colleges also are among the tuition-free institutions mentioned in the Bloomberg Businessweek article on the web. Some tuition-free colleges and universities have different requirements with regard to applicant acceptance, the Bloomberg article shows. Free online courses, on the other hand, are available to anyone with the technology to access them and time to commit to them.

These free [online classes](#) will encourage many to attend college and get an [accredited degree online](#) that will change how they work, where they work, and how the rest of their life progress.
