Can You Make Money Online With Google Adsense And Youtube Partners?

If your looking to make money online, let me start by saying you are in the right place. Let me tell you, you CAN make money online. Over the course of a year working online, I have tried and tested everything and earned a great deal of money online. In this article I will be covering the best free ways to make money online using Google and Youtube. The truth is, anyone can succeed and earn a great deal of money online as well, they just need the proper guidance and determination.

So just how can you do this? Well you are in the right place by reading this article because I started with Google and it took me a long way in my endeavors to earn money online. It's called Google AdSense. It was something my father showed me in a news article. That actually turned out to be a fraud news article, but that's what lead me to find out about Google AdSense. Google AdSense is simply google paying you to place advertisements on your website or blog.[youtube:JOAMyC44pxQ?fs=1;[link:Earn Money Online];http://www.youtube.com/watch?v=JOAMyC44pxQ?fs=1&feature=related]

That signifies in order to do this you need to have a blog. You also have to have relevant content and things men and women wish to read or no one will go to your blog. You don't make money unless somebody clicks the advertisements that Google is posting in your blog. Sometimes these advertisements may pay you as little as \$0.03 per a click. And of course, do not go thinking this indicates you are able to click your personal ads, Google WILL find out and ban you totally.

So granted some Google AdSense users are generating a lot of money online, those people are the ones owning a site with large amounts of visitors each day such as facebook. So for that common person, this is not the best way to go, unless of course you just want some a few nickles and dimes. When it comes to Youtube, that entails pretty much the same thing. You need a video people need to watch, so that folks subscribe to you, and you make money when advertisers location ads on your videos, just like commercials. You cannot become a Youtube partner except you've over 1000 Subscribers. So once again this is not the best way to earn money online for that average particular person.

So what did I end up doing? Well I started a home business as an affiliate marketer. I have made a great deal of money online because of this and I can say for a fact that affiliate marketing is FOR the average man or woman. ANYONE can literally make a lot of money online with affiliate marketing. However you need the right affiliate program and to be on a good team. So what is affiliate marketing? It's a company that pays you to refer people to it. You also get paid for the people those people refer and so on and so on. Many average people just like myself have already made a great deal of money from promoting a company such as GDI.

So when it comes down to the average person making money online, that's what I have to recommend. It comes down to being on a successful team, in a QUALITY affiliate program and the right amount of determination and the desire to change your financial situation. Allow my success to be the proof that anyone can earn money online working from home with a home business. I forgot to mention, I am 18 years old and am running my own home business as an affiliate marketer. GDI has truly been a blessing to me and my family. I must say thanks to God who gave me strength and guided me to change my life and better the lives of the people I care about. Thank you for reading.
