Online Media Technology Breakthroughs Have Improved Online Education

One of the concerns that has kept a large number of people from taking an online course in the past was that these programs used to provide a substandard substitute for learning in a traditional classroom environment. However, a lot of improvements have been made in the technology used to offer [online bachelor degree programs](#) and now students can enjoy learning in a setting which works much like a traditional classroom. Truly interactive education is now available online.

The first major improvement came from the prevalence of high speed internet connections. Broadband connections have allowed people to quickly download files and gain access to websites. Now instructors can place large media files onto the web and students can instantly view or download them without being held back by a slow connection and hours of waiting or downloading.

A large part of modern online classes is conducted with recorded class presentations. These have also been greatly improved, with instructors narrating a PowerPoint presentation. The end result is an experience much like that of being present in the lecture hall for the presentation.

There are also instructors who record their lectures; many students prefer this, since they are able to see the professor speak for themselves. It's also helpful to be able to match your professor's names with faces and voices.

Another improvement in technology has enabled students to interact with each other more effectively. Online discussion boards serve as the virtual classroom, wherein you discuss topics with other students, ask each other questions and converse about the course. Live chat rooms add further functionality to an online education.

Live audio and video chats are also available, depending if your computer meets the necessary system requirements. This makes collaborating on projects with other students a snap - you can also communicate with other students via Skype and other VOIP services.

Just as your professor recorded his own PowerPoint or lecture, you can do the same. There are services and programs you can download that enable you to add voiceovers to presentations and to post them on the internet in easy fashion. Now you can host your own presentation and make a killer report on any topic you were assigned.

Don't think that since you're taking [online bachelor degree courses](#) you won't have to take tests either! Technology advancements have allowed intricate testing systems to be created that are meant to accurately gauge an online student's knowledge. Tests can be timed and can only be started or opened once, and there are all formats of questions including essays, multiple choice and true or false. What would be the point of spending money on an online education if you couldn't even prove to yourself that you know the material?

Online education has come a long way and you can now learn from online courses in a way which is comparable to a traditional classroom setting. There are lectures, student interaction and collaboration and even online tests which work just as in a traditional university. There's no reason not to choose an online education anymore. It's convenient and you can earn the degree you need even if your schedule doesn't permit you to take classes in the traditional manner.

Flexible degree programs that work for YOU. [Accelerated Education Online](#) Its a fact, college educated people earn significantly more than those without a degree. Its never to late to improve your education.
