Number One Guide For Generating Income Online

If you've ever wished to earn money online, Acme People Search is exactly what you've been looking for. I have spent a lot of money on Affiliate programs that merely ended up conning me. If you're being asked to pay money then it is probably a gimmick because they're the ones earning profits not you.

[Try it Free](#)

The issue i have had, when visiting peoples websites or watching their videos is they usually just talk about the way they are being successful. and that you need to subscribe and you will succeed too. I had to find this all out on my own, i wish to pass that knowledge down to everyone else. Right now My goal is to tell you precisely what i did to make the money i make now. So listen up!

1) First you are going to want to create a web site, because that will be your foundation. All your links and information will be in it. Just like this website i've created through GDI (Global Domains International)

2) To make the website you will need to be signed up under step 2. If you are already signed up, or after you have you'll be in the members area. scroll down a little bit and you'll see Domains on the left side. Click "Build your website" and follow the step by step instructions. You may either create an Html code website if you're experienced, or you can select from a variety of templates that GDI offers. Include plenty of information in your website that will aid people better understand this program. Make use of the links given to you and copy and paste them through out your site, then when people visit it and then click on those links they'll be redirected to sign up page and there you have it, you have a referral under you and you just got paid a commission rate.

3) Where do you find these links? you can find them within your ACME people search back office, where you had to undergo steps one, 2 and 3. close to the top of the web page you will notice something that states "Account Settings" float your mouse over that and simply click Get Referral Links. Scroll down and then click on any of those and then copy and paste them within your website, videos, weblogs or articles. The presell page link is the one i usually use and it's worked out very well for me.

4) post some videos on Youtube, DailyMotion, Metacafe any video sharing web site you are able to possibly find. In the description of the video write something similar to, learn to generate and income online, create websites and become your own boss. and then place your link somewhere within the description or a backlink to your website, that will have links to subscribe such as the presell page links. you need people to start flowing to your site naturally which means you dont have to work as much. now there will also be something that says Tags or keywords. These are very essential because this is what will get your video found and get it more views, meaning more referrals. Use keywords like money, cash, fast, business opportunity, home-based business, Search engine marketing, networking, course.

5) I suggest that you invest in [Unique Article Wizard](#)

This is a very powerful tool. This is what works for me, this program allows you to write articles and then it sends your articles to countless web directories on the net. generating you more visitors. This is the simplest way to advertise and market your website or videos. be sure to include your links in these articles. you could have your videos inside the articles or the articles leading to your videos, which lead to your website. You can choose to have it submit to 200 directories per day which is what i have it set at. I would do this once you have your web site, or perhaps a few videos. From then on everything is basically a cake walk, all you have to do is just write a couple of articles each day and email people that subscribe under you and help them out. I also use The Best Spinner

which saves me a ton of time creating articles.
