How to Transfer Videos and Music to your iPhone 4

Despite the fact that the iPhone four is a phone that is not all that it is good for. You will discover that you most likely are going to use your apple iphone for many other things such as photos, games, and of course songs and movies to increase the general experience of owning the product. However, you might find yourself a little stumped on how you can use the numerous capabilities that are available. Transferring music and movies is a very easy process that you'll definitely find yourself utilizing frequently.

Don't Sync the iPhone 4 automatically Many people decide to go with the default settings that are provided when you decide to connect the iPhone to the computer. However, you may also find that it is much more useful to do everything manually because you are given much more control over what actually gets transferred to the device. You may share a computer with someone and not want their music and videos to be transferred over to overload it and make your device seem bogged down.

In order to set it not to automatically sync you will want to un-check the automatically sync option which can be found under the summary tab. iTunes will not appear automatically once the device is connected but you can choose to carry out the process yourself when and if you want to.

Physically Syncing the iPhone four to obtain Tunes and Movie's now that you have disabled that you can really place the media that you want to carry around with you on the iPhone 4. All of the sync settings need to be utilized once you have disabled the automatic ability. Right after you click on on the sync button you have to choose which tunes and movie's that are going to be added by checking the preferred products under the tunes tab. You are able to select the songs or podcast's that are in your library and either add all of them or decide to create only a choose few. All the control is in your hands completely.

Adding Videos to the iPhone four video is something that is just as easy to add to the phone simply because it is similar to the tunes. Once you have additional tunes choose the video tab and then either selecting all of the items or picking and choosing individual files that you would like to be able to watch any time through your iPhone four.

Access Your Photos Any time via the iPhone 4 tunes and videos are not the only things that you may want to be in a position to make use of at any time. Your photos may also come in handy to display individually. You will have to use a separate program in order to import the photos but it is usually just as easy as bringing in tunes and movie's.

An iPhone four is a very useful device that you are going to want to use for a few different tasks so maximize the capabilities.
