# **Stuffed Elephants Are A Childs Best Friend**

This plush elephant was purchased as a birthday gift. I was very impressed with the soft, snugglie fabric this toy was made from. My child actually uses the toy to lay her head on. The shipping was impressive because we received the toy very quickly through the mail and this gives me the confidence to purchase other toys from this company with the understanding that I will receive the toy(s) in a timely fashion.

Dawn gleamed with excitement as she tore open her present, the plush Ellie the elephant. It is a true joy to see a child so happy when they honestly like the present that they get. I was very happy as well because I could see just how well made this animal was, it had a bunch of extra stitches, most stuffed animals do not have half as many.

Not only do kids love stuffed animals but adults do as well. My best friend loves them too and she is 32 years old. I bought her a stuffed plush Ellie the elephant as a thank you gift and she keeps thanking me over and over again. It is so nice to see just how much joy a simple little stuffed animal can bring to a person.

This plush elephant feels so nice when snuggled up to your chest, its no wonder why children love the Super Ellie Elephant toy. My child has proudly proclaimed that this stuffed elephant is one of her most favorite stuffed animals and she has not had it but for a week now.

Talk about an elephant that is a carbon copy of the real thing, this Ellie elephant is looks exactly like a elephant other than the size of course. Most toys look like some cartoon kind of variation but this one it is structured correctly. It may just be me but I always expected my stuffed animals to look like whatever they were suppose to.

When you buy the Ellie elephant you will feel like you got a very good deal. What you get compared to what you paid is way in your favor, I feel like I really got my moneys worth for a change instead of feeling like I bought another piece of crap product from the tv or online again.

I strongly recommend this animal for anyone whom likes stuffed animals. The plush and made like real attributes are worth it but the smile it brings to person you are getting it for is what it is all about.
