# Who Are The Top Managed Service Providers?

In this time and age, it is second nature for business companies and organizations to outsource services instead of hiring in-house. This mainly is to cut costs therefore saving a lot on the business' budget.

A managed service is the approach or method by which transferring of daily management responsibility is practiced as a business strategic method in itself. Of course this does not mean that the accountability is passed, the client remains liable and in complete responsibility of the organizational system. Whoever takes and makes the managed service available is called the service provider.

Managed servers providers are IT or information technology providers who perform a set of tasks or services to the client for a fee. It is both beneficial as the organization need not hire new permanent people therefore cutting costs and at the same time the support costs become predictable. Practically any line of business can benefit from managed services; the following managed servers providers are just among the best to choose services from.

DedicatedNOW looks after your server and maintains your hardware. They have full management of the server with full system security locks as well. They guarantee a 100% network uptime so support is always readily available online. They offer continuous Data Protection (CDP) which is a high performing service for backing up important data.

Singlehop's general managed services provide on call and on demand schemes through remote hands services. It includes software installation, upgrades and troubleshooting. It also offers a managed hosting service intended for companies or organization that do not have their own IT staff available 24 hours and could use support for basic hosting service including control panel troubleshooting.

Now, who are the top managed service providers? DedicatedNOW takes pride in their managed servers backed up by a 24/7 support team. They have their very own datacenter. They aim to please with hardware of great quality at the cheapest rate possible. They make their servers available in Windows and Linux OS. Singlehop's services include upgrade, installation and others. They provide support remotely to your business site. Rackspace and their famous fanatical support team comprises of experts accessible to you 24/7 365. They work like your own business extension.

These managed service providers are on the top of the list for a reason. They are reliable, honest, and they are sure to deliver quality services to your satisfaction.

**About Kevin :** Kevin Abrahams, a writer in the hosting industry, is also a server administrator for DedicatedNOW, a leading [managed server](#) provider.
